Three New Roses

Key to Colored Plate on Front Cover

(1) **Shot Silk.** HYBRID TEA. Well formed buds of gold and orange opening to flowers of coppery rose shot with golden yellow. Petals of good substance with a silky sheen, coloring most unique and attractive. The fragrance, though delicate, is unusually pleasing. Clean, bright foliage, carried in great abundance. Price \$1.00, postpaid.

(2) **Mrs. Henry Bowles.** HYBRID TEA. Warm pink, flushed with salmon. Fragrant, well shaped blooms in greatest profusion. In constant bloom from early spring until late fall. Price \$1.00, postpaid.

(3) **Rev. F. Page-Roberts.** HYBRID TEA. Long buds varying in color from deep coppery-pink to orange and red. Petals of open blooms are of pure golden-yellow on the inside and stained on the outside with copper and red. Flowers are large and full with a rich fruity fragrance. The gorgeous and unusual coloring of the blooms which are produced abundantly throughout the season; the strong, though somewhat low growth of the bush, combined with bright and abundant foliage, make this rose a leader wherever grown. Price \$1.50, postpaid.

SPECIAL—These Three Wonderful Roses
for \$3.25, postpaid.

Rose fields in bloom at the California Nursery Company, Niles, San Francisco Bay region, famous as a rose-growing section. Visitors are always welcome.

California Roses

BECAUSE of the constantly growing demand for field-grown roses from the California Nursery Company, we are this year issuing our first **Rose Catalogue**. We dedicate it to rose lovers everywhere.

Blossoms are what the rose grower desires. That is why it pays to plant only quality roses. Long experience has shown us the value of field-grown stock, carefully budded on thrifty, strong growing Manetti roots. All roses listed are first grade, two-year-old budded plants.

We draw your attention to the color chart on page 9, as a handy means of selecting varieties. We stand ready at all times to answer inquiries about roses.

California Nursery Company

How to Grow Roses

YOUR rose garden will give you pleasure in proportion to the care you give it. Select good stock, of varieties of known merit. Plan your rose garden with a view to mass effects and color harmony. Then give your roses the conditions necessary to assure strong growth and abundant blooms.

1. A quality field-grown two-year-old budded rose, as it comes from the nursery row at Niles. Strong roots and several branches.

2. The correct way to thin out and cut back. Leave not more than three branches.

WHEN TO PLANT

Winter is the best season of the year for planting roses on the Pacific Coast and in the southern states, with the recommendation in favor of early planting. In the northern states planting should be done during the fall or in the spring.

When plants are received, unwrap them with care; do not allow the roots to be exposed to the sun or drying winds. If, for any reason the roots are dry, soak in water for a few hours and then bury in the earth for a few days. If the stems are also dry, bury the whole plant in moist earth for three or four days, and they will again show life and vigor. Prune the top, cutting back the branches at least two-thirds. Thin out, leaving not more than three branches to form the head. The roots should be cut back to six inches; all bruised roots removed. In planting, the same care should be observed as with any tree or plant. When planting, point the roots down, slanting to the side of the hole. Fill in with surface soil to within four inches of the top of the ground, tramping same down. Make a basin around the plant and pour into it ten to fifteen gallons of water. The following day fill in with loose soil.

WHERE TO PLANT

The ideal situation is high ground, well sheltered from the prevailing wind. Along the coast it is advisable to plant roses where they will be shaded by large trees or hedges. This also applies to the interior valleys, provided the shade is not too dense, permitting the plant to receive the sunshine a portion of the day.

THE BEST SOIL

A good heavy loam soil is best for roses. A gravelly soil is better than a very sandy one. In a poor heavy clay or rocky soil, it will pay to dig the hole extra large and two feet deep, removing the excavated soil entirely, then fill the hole with good, rich soil. The ground should be spaded thoroughly and if any well-rotted manure is available, it should be worked well into the soil. Under no circumstances should fresh or new manure be used. If possible it is best to prepare the ground some time before planting.

Remember This about Roses

By "budding" select varieties on the roots of strong-growing Manetti stock, we find that greater growth and more abundant blossoms are assured. "Cheap" spindly roses are a poor investment. Our roses—first grade budded plants—will give you what you pay for. A dozen rose plants from the California Nursery Company, properly planted and cared for, will furnish from 100 to 300 perfect blooms within 6 to 8 months. Think of the thousands of roses they will give in years to come!

QUALITY ROSES

How to Grow Roses

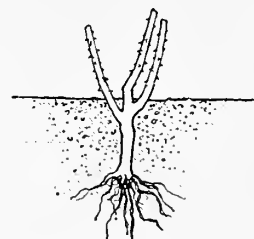

(Concluded)

PLANTING DISTANCES

Distance between plants depends upon the type of rose. Plant the strong Hybrid Perpetual Roses three feet apart, and Hybrid Teas and Teas about two and one-half feet apart. The Polyantha type are more dwarf in their habit and permit of being more closely planted.

FERTILIZING IMPORTANT

Roses are often found blooming under adverse conditions and with little care, but perhaps no plant responds more quickly to "feeding" than the rose. Manure from the cow barn is the best fertilizer you can use. Other manures may be used with good results when the former cannot be conveniently obtained, but never let any green or fresh manure come in direct contact with the roots. Use it only as a top dressing. Roses need fertilizer most when blooming. When the flower buds begin to swell an application of liquid manure will give immediate and pleasing results. Poultry droppings, slacked lime or a handful of ground bone thrown on the ground around the plants, letting the rain take it into the soil, is effective. Many plants are killed by manuring them too freely the first season after planting.

3. Showing the same rose, correctly planted, with branches and roots properly pruned.

POINTS ABOUT PRUNING

No definite rule can be laid down for pruning roses except that Teas and their allied families do not require as severe pruning as the Hybrid Perpetuals and others of equally vigorous growth. There is one fast rule, however, and that is never to allow roses to go unpruned.

The best time is from December 15th to March 1st. The first winter after planting, thin to three main shoots and cut these back at least one-half. In after years with the frame-work branches established, the laterals should be thinned out to prevent overcrowding and those allowed to remain should be cut to spurs of about four buds each. If this method is followed regularly each season, a properly pruned plant will have the shape of a deer's antlers.

With climbers the framework branches should be trained up against the wall in the shape of a fan, not leaving more than three or four, and these should be cut back severely the first two seasons to promote vigor and sturdiness of growth. In after years shorten in the laterals and thin out sufficiently to prevent overcrowding, otherwise the plant will be a mass of dead wood and twisted branches, and its vigor will become seriously impaired. If you fail to prune and thin out you will have an overabundance of small flowers.

When the roses have stopped blooming in the early summer the faded buds should be cut and the plants given a light pruning, or more correctly, a pinching back, which will have the effect of making them respond with a bounteous bloom in the summer and fall.

WINTER PROTECTION

In the mild climate of the Pacific Coast and extreme south no protection is needed for even the tenderest Teas and Hybrid Tea sorts. In colder climates for tender sorts, we advise mounding up the dirt around the base of the bush about six or eight inches. In addition a fork full of straw manure should be forked well into the branches. To make this easier, trim the canes back to within fifteen inches of the ground. A good bunch of leaves or straw on the ground around the bushes weighted down to prevent blowing away will help to prevent injury where the weather is very cold.

Are You Planning a Rose Garden?

Our collections will help you in making a selection. See pages 2, 6, 7, 10 and 15. Or consult the color chart on page 9, and select your own roses. Write to us, and we will gladly give you a plan for a rose garden, with suggestions as to varieties.

Six Golden Roses

Eldorado. HYBRID TEA. A clear, yellow rose that holds its color when fully opened. The lovely cupped flowers are very double with petals beautifully crinkled at the center of the bloom. Foliage clean and abundant. An exceptionally good garden rose. Price \$1.25, postpaid.

Independence Day. HYBRID TEA. Flowers sunflower yellow overlaid with orange apricot, all of which tints are fused together in the mature blooms. The buds are gracefully olive shaped, developing into flowers with charmingly curved substantial petals. Foliage glossy, dark green. As a decorative rose it has few equals. Price \$1.00, postpaid.

Mme. Poincare. HYBRID TEA. Large lemon yellow blooms. The inner petals are fringed and crinkled, giving the flowers the effect of a peony. The bush is a very robust grower with good foliage. Price \$1.25, postpaid.

Souvenir De Claudius Pernet. HYBRID TEA. Flower of the most striking sunflower yellow color, deeper in the center; long pointed and exquisitely shaped, carried on long stiff stems. A vigorous grower of erect habit, with brilliant green foliage. This rose is sometimes disappointing the first season, but the glorious blooms on a well developed bush amply make up for the imperfect flowers of the first summer. Price \$1.00, postpaid.

Souvenir De H. A. Verschuren. HYBRID TEA. This rose presents one of the colors which is being so much sought after by rosarians, a beautiful apricot yellow shading into saffron yellow at the edges. A very strong grower and a profuse bloomer. The roses are borne on strong stiff stems. Fragrant. Price \$1.00, postpaid.

Sunstar. HYBRID TEA. Flowers deep orange and yellow, edged, veined and splashed crimson and vermillion; its color effects vary in tone and intensity as the bloom develops. Buds long and elegant, carried on rigid stems. The bush is strong and vigorous. Price \$1.00, postpaid.

Above 6 roses for \$5.75, postpaid.

Independence Day

Six New Roses

Betty Uprichard. HYBRID TEA. Buds are coppery red; the flowers are semi-double, the color is a charming salmon pink, the reflexed petals being shaded orange cerise. The buds are of good form and the rose is deliciously sweet scented. Price \$1.00, postpaid.

Golden Ophelia. HYBRID TEA. An excellent new seedling of Ophelia. The flower is of medium size, deep golden yellow in the center, paling slightly toward the outer petals; of perfect symmetrical form, and the plant is a sturdy, stiff-stemmed grower. Price \$1.00, postpaid.

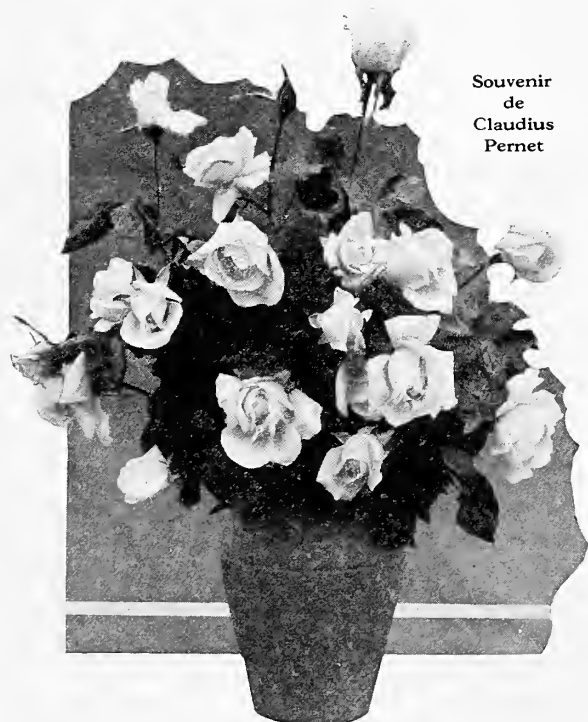

John Russell. HYBRID TEA. Rich velvety-crimson blooms, borne on upright stems. Flowers are very full and double and of good form. A rose for those who want something out of the ordinary. Price \$1.50, postpaid.

Mary Pickford. HYBRID TEA. A new rose somewhat like Souvenir de Claudius Pernet, though smaller. Color is sunflower yellow paling to white at edges of petals. Buds are of beautiful form and open to semi-double blooms. A very upright growing plant. Price \$1.50, postpaid.

Mrs. W. C. Egan. HYBRID TEA. Deep flesh color, softly contrasted with a lighter shade of soft pink and a golden glow at the base of the petals. It is an exceptionally free and constant bloomer and the flowers which are carried on long stems last for a long time either on the plant or when cut. Blooms almost continuously. Price, \$1.25, postpaid.

Padre. HYBRID TEA. There is a charm of coloring in this rose which is most novel, being a brilliant coppery red flushed with yellow at the base. It is not only a strong upright grower but is exceedingly free flowering. One of the most novel bedding roses of recent introduction. Price \$1.00, postpaid.

The above 6 roses for \$6.50, postpaid.

described on the next page
—32 rare roses in all—
\$29.50, postpaid

This collection will form a wonderful nucleus for a rose garden. Please note also the collection offered on pages 2, 8, 10 and 15. All of these roses are first grade, strong growing budded plants. Right from the start they will furnish many beautiful blooms.

A Description of the Main Classes of Roses

Tea. As a rule, to which there are exceptions, their growth is slender and not very vigorous. Foliage is almost always very glossy. Their tendency is to bloom continuously. They require considerable pruning, good soil, and proper care, but will well repay all the care and attention they receive.

Hybrid Tea. A class of comparatively recent origin and today the most important of all. They show a blending of the beauty, delicacy and perpetual blooming habit of the Teas with the vigor and great hardiness of the Hybrid Perpetual group. Many have the tea scent very strongly developed, while the fragrance of others suggests the Hybrid Perpetuals.

Hybrid Perpetual. Hardy and resistant to cold, enduring a much lower temperature than either Teas or Hybrid Teas. Growth is usually vigorous and upright, often with long, unbranched canes. Stems are strong, frequently very long, and flowers are usually borne erect. Foliage is rough and entirely without the glossy surface so pronounced in the Teas. The fragrance is likewise distinct.

Polyantha. "Baby Roses." Characterized by small flowers borne in large clusters. In most other respects there are few points of similarity. Habit of growth varies from dwarf to tall forms. Used for forcing as well as outside culture.

Wichuriana. A trailing wild rose from Japan. Has long pliable shoots which are easily trained. Noted for its wealth of bloom in the early spring months and its extreme hardiness.

Golden Ophelia

Twenty Recent Introductions

Angele Pernet. HYBRID TEA. Buds of deep, flaming orange, opening to semi-double blooms of brilliant tango. The most strikingly colored rose we have seen. Foliage is glossy and remarkably free from mildew. Stock is limited. Price \$2.00.

Comtesse de Cassagne. HYBRID TEA. Very large blooms of ivory yellow and pink. Summer blooms are often clear yellow. Well formed buds, borne on long, stiff stems. Price \$1.50.

Edel. HYBRID TEA. Gives promise of becoming one of our finest white roses. It is very large, a perfect model, bloom of great depth, snowy white with faint ivory shadings toward the base. A free grower with a stout habit, being especially suitable for massing and bedding. Very free blooming. A superb rose. Price \$1.00.

Elsie Beckwith. HYBRID TEA. Flowers a rich, deep and glowing rosy pink with large, bold petals of good substance, sweetly scented, and carried rigidly upright; growth very vigorous; fine for decorative work. Price \$1.00.

Ethel Somerset. HYBRID TEA. Flowers shrimp pink, edge of petals deep flesh coral pink; very large, full, perfectly finished, with high pointed center and very deep shell-shaped petals of great substance. It blooms profusely, and the flowers which are carried on rigid stems are possessed of delightful fragrance. Price \$1.00.

Felicity. HYBRID TEA. Mallow-pink, with cream and cerise shading. The fragrant blooms are freely borne on good stems. A new rose, that is deserving the popularity it has attained. Price \$1.00.

Feu Joseph Looymans. HYBRID TEA. Remarkable for the length and beautiful form of its apricot colored buds, and also for its unusually bright, glistening foliage. The open blooms of golden buff are quite full and hold their color exceptionally well. Stock limited. Price \$1.50.

Fragrant Bouquet. HYBRID TEA. Beautiful well-pointed buds, blooms of clear light pink shading to cream on outer petals, double to very double and very fragrant. Very vigorous bush, branching and a very profuse bloomer. Price \$1.00.

Imperial Potentate. HYBRID TEA. This fine new garden rose bears splendidly formed buds of rich rosy carmine, which open to a deep pink bloom with an exceptionally fine fragrance. Foliage is thick and leathery, and the plants are strong growers. We recommend this rose without reservation. Stock limited. Price \$1.50.

Irish Fireflame. HYBRID TEA. Orange and crimson buds, opening to very large single blooms of gold and apricot with pink shadings. Foliage bronze and dark green. An unusually strong growing rose. Price \$1.00.

Mary Wallace. HYBRID WICHURIANA. (Dr. W. Van Fleet.) Flowers are very large, well formed, semi-double, of a bright clear rose-pink with salmon base to the petals. Plant of splendid vigor and has superb foliage. Named by the Portland Rose Society in honor of the daughter of Secretary of Agriculture Wallace. Price \$1.00.

Mrs. Beckwith. HYBRID TEA. Long deep yellow buds opening to lemon yellow blooms, paling to white at edge of petals. The plant is a sturdy, erect grower with good foliage. Price \$1.50.

Roselandia. HYBRID TEA. Flower is apricot-yellow, shaded cadmium-yellow. Buds and blooms are of good form, with high center. Stems are good. Freec flowering. Price \$1.50.

Souv. de Claudius Dennoyl. HYBRID TEA. Enormous buds of dark red, opening to large fragrant blooms of rich, velvety crimson. Flowers are cupped, and the petals are exceptionally thick and heavy. Bush is such a vigorous grower it can be used as a semi-climber or pillar rose. Price \$1.00.

Souv. de Georges Pernet. HYBRID TEA. Substantial buds of distinctive form opening to immense flowers of metallic rose, shading through copper to gold at base of petals. This rose has every quality needed in a garden rose. The bush is an exceptionally strong grower, and the wonderfully beautiful blooms are borne in the utmost profusion. One of the very best bedding roses. Price \$1.00.

Superba. POLYANTHA. Glowing dark red flowers of small size borne in large compact clusters. A very profuse bloomer. Plant quite vigorous. The best dark red "baby rose." Price \$1.00.

The Queen Alexandra. HYBRID TEA. A rose of most unusual color, being scarlet on inside and yellow on outside of petals; medium sized blooms, fairly full and somewhat fragrant. A beautiful bedding rose. Price \$1.50.

Una Wallace. HYBRID TEA. An exquisitely modelled rose of luminous old rose color. The medium sized blooms are carried erect on good strong stems. The plants are vigorous growers. One of the most satisfactory roses of recent introduction. Price \$1.50.

Westfield Star. HYBRID TEA. Originators have been for years endeavoring to bring out a satisfactory white rose. From the many favorable comments made concerning this rose it is evidently meeting with the approval of our critical rose lovers. The color is paper-white, shaded cream. The flowers are of good substance and are borne very profusely. Price \$1.00.

White Ophelia. HYBRID TEA. A white sport of the well known Ophelia. Has the beautiful form of the Ophelia family and has a delightful fragrance which is rare in white roses. A very satisfactory rose for cutting. Price \$1.00.

Souvenir de
Georges Pernet

All prices are postpaid. The twenty rare varieties listed above, \$19.75, postpaid.

The Famous "Golden Emblem"

(Shown in all the beauty of its natural colors on the opposite page.)

Golden Emblem. HYBRID TEA. Most wonderful in bud and flower. The buds, close wrapped and full, are of golden yellow striped with crimson on the outer petals. When open the rose is of the purest Cadmium yellow. The evenness and purity of the color tone in this rose is most

remarkable, and it seems destined to become one of the world's most popular varieties among those who love to have a gold rose in their garden. The foliage is bright elm green and the stems are strong and upright. Do not fail to include this variety in your rose garden.

\$1.00 each; 3 for \$2.75; 10 for \$9.00. All postpaid.

The "Niles Three"

These three superb roses—Los Angeles, Mme. Edouard Herriot ("Daily Mail") and Hoosier Beauty—are shown in the color plate on page 14.

Los Angeles. HYBRID TEA. Originated in California and named in honor of the southern city by Howard & Smith, Los Angeles. Its flawless form and perfection of color has made it acclaimed throughout the world as the pink-par-excellence. Its lovely buds are long and proudly pointed, gradually changing to blooms of perfect form, and of a color best described as flaming pink, springing from a golden setting. And with it all a valiant bloomer, rose succeeding rose throughout the season, filling the garden with perfume and loveliness.

Mme. Edouard Herriot. HYBRID TEA. A most individual rose with unsurpassed and unique coloring. Though named in honor of the wife of a Premier of France, it is better known as "DAILY MAIL" by reason of winning the famous Gold Cup offered by that newspaper for the best new variety. As a bedding rose it stands supreme, not only for its profusion of blooms but for the vivid color tones and

shading. A rose of medium size and semi-double form. The old-rose colored outer petals curl back at the edge, disclosing a riot of color from coral red to flame scarlet and the base of the petals touched with pure gold. The foliage is bright green and forms a fitting setting for this garden gem. Towards late afternoon when viewed in the glancing rays of the setting sun this rose glows as if illuminated by some inner flame. No modern rose garden is complete without one or more plants of Mme. Edouard Herriot.

Hoosier Beauty. HYBRID TEA. One of the most distinctive crimson roses grown. The dark red buds are long, slender and of almost perfect form. The open bloom which ranges in color from a velvety red to brilliant crimson is of such size and substance that one is surprised that it has opened from a bud so slender and elegant. The fragrance of this rose is of that fresh spicy quality that has made the red rose the flower of love and poetry.

These three roses, postpaid, for \$2.35. Any one of these roses, price 85 cents, postpaid.
The four above, postpaid, for \$3.25.

THE "NILES THREE" AS CLIMBERS

Now you may have these finest of roses as climbers. Read their descriptions in the list of climbing roses on page 19. In all combination offers, including the "Niles Three," these climbing roses may be specified in substitution for the bush form at the same price.

THE GLORIOUS "GOLDEN EMBLEM"
(Described on opposite page)

NOTHING of beauty is this rose garden at the home of Dr. and Mrs. R. T. Legge, 6 Roble Road, Berkeley, California. It admirably shows the possibility of arranging roses to attain a formal garden effect. For many months in the year it gives delight, with its fragrance and its masses of blooms.

MOULIN

In this garden are arranged, with a view to color harmony, some of the finest of the newer roses, with many of the tested bush varieties such as Los Angeles, Golden Emblem, and Mme. Edouard Herriot. Free blooming climbers on the lattice fence and arbor, and hedge roses in the foreground, complete the colorful picture.

THE "NILES THREE"

(Described and Specially Priced on Page 10)

General List of Bush Roses

Tea Roses, Hybrid Teas and Hybrid Perpetuals

Alexander Hill Gray. TEA. Lemon yellow, large, of good form, strongly tea-perfumed; foliage of good habit; growth vigorous.

America (Hill's) HYBRID TEA. Large, shapely pearly-pink flowers, borne on long stems. A wonderful keeper; stems practically free from thorns.

American Beauty. HYBRID PERPETUAL. Crimson carmine shaded deep pink, very fragrant; foliage strong and of good color.

Angele Pernet. HYBRID TEA. Described on page 8. \$2.00.

Betty. HYBRID TEA. Coppery rose suffused with golden yellow, large, fairly full and of good form.

Betty Uprichard. HYBRID TEA. Described on page 6. \$1.00.

Black Prince. HYBRID PERPETUAL. Dark crimson, nearly black; flowers globular.

Candeur Lyonnaise. HYBRID PERPETUAL. A vigorous grower, flowers white, large, and freely produced.

Chateau de Clos Vougeot. HYBRID TEA. Velvety scarlet, shaded fiery red, changing to a dark shade when fully open; growth somewhat dwarf.

Cheerful. HYBRID TEA. Shining pink illumined with orange and yellow at the base of the petals. Flowers large, full and of perfect shape and form. Always in bloom.

Cleveland. HYBRID TEA. Flowers of the largest size of good substance and of exquisite form. Color, a reddish copper or old rose, the petals showing a distinct and charming metallic sheen.

Columbia. HYBRID TEA. Flowers a handsome shade of pink, deepening as they open to a glowing pink, and produced on long, stiff stems, fragrant.

Comtesse de Cassagne. HYBRID TEA. Described on page 8. \$1.50.

Constance. HYBRID TEA. A handsome cadmium yellow; blooms large, full and globular; buds long and pointed, deep yellow streaked with carmine; foliage glossy green; growth robust.

Crusader. HYBRID TEA. Growth sturdy, canes erect, foliage heavy, flowers large with petals reflexed at the edges; color a rich velvety crimson; very free flowering.

"Daily Mail" (Mme. Edouard Herriot). HYBRID TEA. Described on page 10. 85 cts.

Dean Hole. HYBRID TEA. Silvery carmine shaded with salmon, large, full and of fine form, fragrant.

Duchess of Sutherland. HYBRID TEA. A warm rose pink, shaded lemon yellow, white at the base; blossoms large, carried on rigid stems, with a rich sweet briar perfume. Growth erect and vigorous with olive green foliage.

Duchess of Wellington. HYBRID TEA. Saffron yellow, stained with a rich crimson changing to a coppery saffron yellow; fragrant; a splendid decorative variety.

Edel. HYBRID TEA. Described on page 8. \$1.00.

Eldorado. HYBRID TEA. Described on page 6. \$1.25.

Elsie Beckwith. HYBRID TEA. Described on page 8. \$1.00.

Ethel Somerset. HYBRID TEA. Described on page 8. \$1.00.

Felicity. HYBRID TEA. Described on page 8, \$1.00.

Feu Joseph Looymans. HYBRID TEA. Described on page 8. \$1.50.

Florence Forrester. HYBRID TEA. Snow white, yellow tinged when in bud, pure white when open. Blooms very large and fragrant. Dwarf grower but sturdy.

Fragrant Bouquet. HYBRID TEA. Described on page 8. \$1.00.

Frau Karl Druschki. HYBRID PERPETUAL. Pure white, outer petals occasionally tinged with pink, large, moderately full, long and handsome buds; growth vigorous, free flowering and hardy.

General MacArthur. HYBRID TEA. Bright scarlet red, large and full, sweet scented, buds usually borne singly on long, stout stems.

General Superior Arnold Janssen. HYBRID TEA. Glowing deep carmine, well filled and perfumed; finely formed buds on perfect stems. Growth vigorous, compact and continually blooming.

George Dickson. HYBRID TEA. Deep scarlet, shaded velvety crimson. Ground-color red with scarlet tips, while the inside of the expanding petals is nearly black. Large, very full, with enormous petals.

Golden Emblem. HYBRID TEA. Described on page 10. \$1.00.

Golden Ophelia. HYBRID TEA. Described on page 6. \$1.00.

Gruan an Teplitz. HYBRID TEA. Rich scarlet, overlaid with crimson. The ground color is intensely red. A wonderfully free bloomer. Growth extremely vigorous, sometimes classed as a climber. Unexcelled as a hedge rose.

All of these roses are strong two-year-old bushes, budded on Manetti roots. They will bloom profusely next summer. Price (except new roses whose price is specially noted), 75 cents each; 5 for \$3.50; 10 for \$6.50; 30 for \$16.50; 100 for \$55. All postpaid. Consult Color Chart and Index on page 9, as an aid in selecting varieties.

Special Combination Offers

General List of Bush Roses--Continued

Hadley. HYBRID TEA. Flowers rich crimson with velvety texture, of good shape, size and substance, sweet scented; growth free and constant.

Harrison's Yellow. AUSTRIAN BRIER. Flowers semi-double, literally covering the whole plant during the blooming season with their bright golden color.

Hoosier Beauty. HYBRID TEA. Described on page 10 85 cts.

Hortulanus Budde. HYBRID TEA. Strong, vigorous and branching, always covered with a profusion of bloom. Buds long and pointed; flowers dark red with a yellow center. An excellent variety for bedding.

Imperial Potentate. HYBRID TEA. Described on page 8. \$1.50.

Independence Day. HYBRID TEA. Described on page 6. \$1.00.

Irish Elegance. HYBRID TEA. Single bronze pink blooms which, while expanding, assume varied apricot hues. Blooms abundantly from early spring to end of flowering season.

Irish Fireflame. HYBRID TEA. Described on page 8. \$1.00.

Isobel. HYBRID TEA. Flowers single and of a rich flushed orange scarlet color with pink copper shadings, pure yellow centers and fine fragrance. The wild-rose loveliness of Isobel makes it extremely popular.

John Russell. HYBRID TEA. Described on page 6. \$1.50.

Jonkheer J. L. Mock. HYBRID TEA. Good grower and a free bloomer; flowers produced in profusion of a rich carmine changing to bright pink with a silvery reflex.

Juliet. HYBRID TEA. Outside of petals old gold, interior rich rosy red, changing to deep rose as the flowers expand. Flowers are rather large, double, fragrant and borne in moderate quantity. Extremely vigorous grower.

K. of K. (Kitchener of Khartum). HYBRID TEA. Semi-double and intense scarlet, with large and velvety petals, produced abundantly; vigorous grower and free branching; a rose of distinction and beauty.

Kaiserin Augusta Victoria. HYBRID TEA. Pearly white, tinted with lemon in the center. Large, full and of perfect form. Very free flowering. Recognized as the best white rose.

Killarney. HYBRID TEA. Flowers a rosy carmine, large, semi-double; long buds opening well; growth robust and free flowering.

Killarney Brilliant. HYBRID TEA. Rose pink—more colorful than the Killarney. Bronze foliage suffused with amber produces an unique and beautiful bush.

Lady Alice Stanley. HYBRID TEA. Outside of petals coral-rose, inside pale flesh-pink. Free-blooming plant and most dependable for both bedding and cutting.

Lady Hillingdon. TEA. Deep, rich, permanent apricot yellow in color, buds long, pointed and handsome; foliage when young dark violet, turning to deep green with age.

La France. HYBRID TEA. Pale pink suffused with silvery blush, large, full and globular, of good form and substance and pleasantly fragrant. A rose that has enjoyed a long popularity solely on its merits.

Laurent Carle. HYBRID TEA. Brilliant, velvety carmine; flowers large, of perfect form and delightful fragrance; a good grower and abundant free bloomer.

Legion. HYBRID TEA. Silvery rose flowers of good form and unusually fragrant.

Los Angeles. HYBRID TEA. Described on page 10. 85 cts.

Louise-Catherine Breslau. HYBRID TEA. Flowers shrimp pink, shaded with orange and chrome yellow, large, full and globular. Growth of plant is low but very sturdy with strong branches. Practically mildew-proof.

Mme. Butterfly. HYBRID TEA. Flowers a brilliant pink suffused apricot and gold, buds carried on erect stems; foliage and habit of growth unsurpassed. A very fragrant rose with buds of almost perfect form.

Mme. Caroline Testout. HYBRID TEA. Bright pink. The official city flower of Portland, Oregon. Flowers of the largest size and beautifully formed.

Mme. Jules Bouche. HYBRID TEA. Lovely white blooms slightly tinged with blush. Buds are long, slender and well formed. The bush is a good strong grower.

Martha Drew. HYBRID TEA. Creamy white with rose colored center. Buds are beautifully pointed and carried upright; sweetly scented. A very fine rose for massing, bedding and exhibition purposes.

Mary Pickford. HYBRID TEA. Described on page 6. \$1.50.

Mary Wallace. HYBRID TEA. Described on page 8. \$1.00.

Miss Lolita Armour. HYBRID TEA. One of the most striking color combinations ever seen in a rose. As the flowers expand, they develop to a deep coral-red with a golden coppery-red suffusion, the base of the petals being a rich golden-yellow with coppery sheen. The flower is very double and cup-shaped, and the vigorous plants are a continual mass of brilliant bloom.

Miss Willmot. HYBRID TEA. This almost perfect white rose deserves wider popularity. Flowers well formed of enormous size with a touch of faint cream or pink.

Mme. Edouard Herriot ("Daily Mail"). HYBRID TEA. Described on page 10. 85 cts.

Mme. Poincaré. HYBRID TEA. Described on page 6. \$1.25.

Isobel

All of these roses are strong two-year-old bushes, budded on Manetti roots. They will bloom profusely next summer. Price (except new roses whose price is specially noted), 75 cents each; 5 for \$3.50; 10 for \$6.50; 30 for \$16.50; 100 for \$55. All postpaid. Consult Color Chart and Index on page 9, as an aid in selecting varieties.

General List of Bush Roses -- Concluded

Mrs. W. C. Egan

Modesty. HYBRID TEA. Flowers pearly cream flushed with rose veined with vermillion, buds unusually long and pointed, of good form.

Mrs. Aaron Ward. HYBRID TEA. Indian yellow, washed salmon rose, buds elongated and opening well; growth vigorous and floriferous. The frilled petals of this medium sized rose give it a charm that is distinctive.

Mrs. Ambrose Ricardo. HYBRID TEA. Flowers quite double, of good form, bright flesh-pink overlaid with a delicate tinge of yellow, delightfully fragrant.

Mrs. Beckwith. HYBRID TEA. Described on page 8. \$1.50.

Mrs. A. R. Waddell. HYBRID TEA. Orange pink or reddish salmon, outer petals flesh. Of medium size and semi-double. Highly colored and very free blooming.

Mrs. Chas. Russell. HYBRID TEA. Flowers rosy carmine, large, full, and fine type; growth vigorous.

Mrs. Franklin Dennison. HYBRID TEA. Flowers porcelain white, deepening to ochre at the base; of enormous size, beautifully pointed buds of great substance.

Mrs. Henry Bowles. HYBRID TEA. Described on page 2. \$1.00.

Mrs. Henry Morse. HYBRID TEA. Bright rose tinged with clear vermillion, fine in size and substance, of good form and sweetly scented; a good all-around variety.

Mrs. Herbert Stevens. TEA. White with fawn and peach shadings toward the centre; perfectly formed, with a distinct tea perfume. Regarded as one of the best white ever-blooming roses.

Mrs. W. C. Egan. HYBRID TEA. Described on page 6. \$1.25.

Mrs. Wakefield Christie Miller. HYBRID TEA. Charming flowers of clear rose and light pink, sweetly perfumed. Dependable, strong upright grower with large foliage. Always in bloom. Recommended as a bedding rose.

Mrs. Wemyss Quin. HYBRID TEA. Flowers intense lemon chrome washed with maddery orange. The guard petals are tinged crimson orange, tipped brilliant coppery crimson; of excellent form and very sweetly scented.

Niles Cochet. HYBRID TEA. A striking rose originated on our growing grounds at Niles. Outer petals shading from Tyrian rose to the faintest of flesh pink. Bountiful bloomer, sturdy and strong.

Ophelia. HYBRID TEA. Salmon-flesh shaded with rose, large, well-shaped blooms, standing up well on stiff stems; growth vigorous and free flowering; good for forcing.

Padre. HYBRID TEA. Described on page 6. \$1.00.

Paul Neyron. HYBRID PERPETUAL. Pure rose red, exceptionally large and full, buds of good type; growth upright, strong and vigorous; one of the largest roses in cultivation.

Pink Maman Cochet. TEA. Rose pink with lighter creamy yellow center. Growth extremely strong.

Premier. HYBRID TEA. Flowers pure rose-pink throughout the season, lighter in summer and deeper in cooler weather, deliciously fragrant and borne on stiff, thornless stems; growth rapid. Free flowering.

Radiance. HYBRID TEA. A popular American rose that blooms all summer; it has long, upright stems, perfectly formed flowers of a lovely rosy pink color.

Rev. F. Page Roberts. HYBRID TEA. Described on page 2. \$1.50.

Rose Marie. HYBRID TEA. Flowers deep pink, beautiful formed buds, very free bloomer. Foliage clear green. Vigorous grower. A rose that is more popular each year.

Roselandia. HYBRID TEA. Described on page 8. \$1.50.

Sensation. HYBRID TEA. Enormous scarlet crimson blooms of fine form and substance; very sweet scented. The bush is a strong vigorous grower.

Shot Silk. HYBRID TEA. Described on page 2. \$1.00.

Souvenir de Claudius Pernet. HYBRID TEA. Described on page 6. \$1.00.

Souvenir de H. A. Verschuren. HYBRID TEA. Described on page 6. \$1.00.

Souv. de Claudius Dennoyel. HYBRID TEA. Described on page 8. \$1.00.

Souv. de Georges Pernet. HYBRID TEA. Described on page 8. \$1.00.

Sunburst. HYBRID TEA. Handsome cadmium yellow with orange center, fairly full, cup shape, buds borne singly on long stems and pointed, opening up well.

Sunstar. HYBRID TEA. Described on page 6. \$1.00.

The Queen Alexandra. HYBRID TEA. Described on page 8. \$1.50.

Ulrich Brunner. HYBRID PERPETUAL. Geranium red changing to carmine, large, fairly full, cup-shaped, opens well, fragrant; growth vigorous, erect, hardy and free flowering. Is very good as a hedge rose.

Una Wallace. HYBRID TEA. Described on page 8. \$1.50.

Westfield Star. HYBRID TEA. Described on page 8. \$1.00.

White Maman Cochet. TEA. The greatest of all the Cochets. Buds and flowers are magnificently formed and borne very freely. Like Maman Cochet, the stem is rather weak for the enormous flowers, otherwise almost faultless.

White Ophelia. HYBRID TEA. Described on page 8. \$1.00.

Wm. F. Dreer. HYBRID TEA. Soft, silvery shell pink, base of petals a rich golden yellow, especially beautiful in all stages of development; foliage robust and unique, growth vigorous and free flowering; a good garden rose.

Willowmere. HYBRID TEA. Pronounced coral-red, suffused with carmine in the bud, opening to a large, full, handsome flower, shrimp-pink, shaded yellow in the center and flushed carmine-pink towards the edges of the petals.

All of these roses are strong two-year-old bushes, budded on Manetti roots. They will bloom profusely next summer. Price (except new roses whose price is specially noted), 75 cents each; 5 for \$3.50; 10 for \$6.50; 30 for \$16.50; 100 for \$55. All postpaid. Consult Color Chart and Index on page 9, as an aid in selecting varieties.

Climbing Roses

American Pillar. HYBRID WICHURIANA. Rich rosy pink approaching brilliant carmine with a glint of white in the center surrounded by long stamens of a beautiful golden yellow. The large flower clusters which completely envelop the plant are borne on long arching stems clothed with an abundance of glossy dark green leaves. A tremendous grower with thick vigorous canes and without an equal for planting singly or as a hedge. Very attractive in the autumn with its bright red seed pods.

Belle of Portugal. WICHURIANA. Flowers a soft pink flushed with yellow at the base of petals, buds long and pointed, expanding into blooms of good size, form and substance; foliage light green; growth rampant, vigorous, climbing and free blooming.

Cherokee Pink. CHEROKEE. Ruddy pink flowers of largest size, single, and borne profusely in the spring months.

Clg. Belle Siebrecht. HYBRID TEA. Flowers bright rosy pink, large, well formed and sweetly perfumed, buds long and tapering; plant a vigorous grower and free bloomer.

Clg. Cecile Brunner. POLYANTHA. A vigorous climber which may be held in the bush variety except an exact counterpart of the great favorite, Mlle. Cecile Brunner, except that it is a much more robust grower. Always in bloom; flowers perfectly double, rosy pink, petals in bud daintily reflexed. Delightfully fragrant and in every respect a most exquisite rose.

Clg. Etoile de France. HYBRID TEA. Flowers velvety garnet, with bright cherry red center; large, full long bud carried on long stiff stems and very fragrant. A vigorous climber.

Clg. H. V. Machin. HYBRID TEA. Flowers of large size, black-grained scarlet crimson, full, good form with high pointed centers, borne on stout stems.

Clg. Kaiserin Augusta Victoria. HYBRID TEA. Outer petals of flowers creamy white, center Naples yellow, large, full and of good form; growth vigorous and free flowering.

Clg. Lady Ashtown. HYBRID TEA. Sparkling pink blooms of very good form. Buds are long and pointed, with recurved petals. One of the best pink climbers, as the buds do not ball.

Clg. Lady Hillingdon. TEA. Flowers large and loose with long, pointed buds and large petals, color a deep apricot yellow; growth strong and vigorous; foliage when young dark purple changing to deep green with a violet hue with age at maturity.

Clg. Mme. Caroline Testout. HYBRID TEA. Flowers rose with a brighter center, large, full and globular; in habit of growth vigorous and free flowering; a perfect companion to its bush progenitor.

Clg. Mrs. Aaron Ward. HYBRID TEA. Yellow, tinted salmon rose. Color variable. In spring it is nearly white outside, with blush of light salmon center. In the fall the color deepens to a good yellow.

Climbing Ophelia. HYBRID TEA. A combination of creamy white and pale pink with a glint of golden yellow in the folds of the petals. Very fragrant. A very valuable acquisition to the climbing section, producing a wealth of perfect blossoms during the entire season.

Clg. Papa Gontier. TEA. Rosy crimson with carmine center. Flowers identical with the bush variety except that they are somewhat larger. Blooms very freely; growth remarkably strong. An admirable free-blooming climber and in every respect superior to its parent.

Clg. Sunburst. HYBRID TEA. Flowers when in the bud are long and pointed, but when fully opened they are large and full and a distinct ochre yellow in color. The plant is a strong grower and a good climber.

Clg. Yellow Cecile Brunner. CLIMBING POLYANTHA. Small, rosy pink and yellow flowers, very fragrant and borne in beautiful graceful sprays and blooming recurrently throughout the season. A bouquet rose with a real charm.

Dr. W. Van Fleet. HYBRID WICHURIANA. A universal favorite; flowers delicate flesh pink, so perfect in form, color and fragrance that it is difficult to find any other rose to compare with them in sheer loveliness. Canes attain a growth of fifteen feet in a single season. The flowers are borne on long individual stems. Beautiful shiny bronzy green foliage, crimson thorns.

Emily Gray. WICHURIANA. Foliage like Berberis Vulgaris, great substance and very glossy; flowers rich golden yellow. Without doubt the finest yellow Wichuriana rose yet introduced.

Excelsa. HYBRID MULTIFLORA. Known as "Red Dorothy Perkins." Flowers range from deep pink to red and are borne in great profusion. More resistant to mildew than Dorothy Perkins.

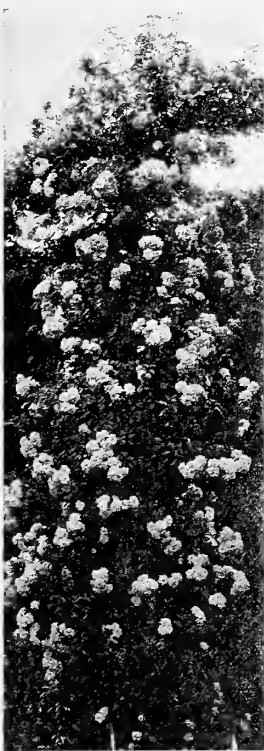

Fortune's Yellow. (Beauty of Glazenwood.) NOISETTE. Flowers creamy shaded orange and rose, semi-double and of good form and substance; foliage a bright green; a rampant climber and when in season a prolific bloomer.

Gold of Ophir. NOISETTE. Apricot yellow. A medium sized rose, blooming in clusters, of a very singular color, being a bright coppery red, petals edged yellow. A vigorous climber.

Marechal Niel. TEA. Flowers golden yellow, large, full, globular, of good form and highly perfumed; growth robust, climbing and free flowering. This grand rose originated over sixty years ago still retains its popularity.

Paul's Lemon Pillar. HYBRID TEA. Exceptionally large sulphur yellow flowers, very double and well formed and quite fragrant. The buds are pale lemon. The bush is a strong, vigorous grower. The coastal region seems to be exceptionally favorable for it.

Paul's Scarlet Climber. HYBRID WICHURIANA. This peerless climbing rose of the purest vivid scarlet color, remaining bright until the flowers fall, is in a class by itself. The blooms are of medium size, semi-double and perfect in bud form and clothe the plant with a blazing mantle in the early summer months. It has been awarded many medals by Rose Societies at home and abroad.

Excelsa

75 cents each; 5 for \$3.50; 10 for \$6.50; 30 for \$16.50; 100 for \$55. All postpaid.

Climbing Roses -- Concluded

Silver Moon. HYBRID WICHURIANA. Long creamy buds followed with beautiful semi-double flowers four and a half inches in diameter produced in small sprays. The transparent white petals of great substance are beautifully cupped, forming clematis-like flowers, with large yellow stamens. Its boundless vigor makes it invaluable where quick shade is desired, or unsightly objects are to be covered.

Star of Persia. Austrian Briar. A brilliant new rose with flowers on the order of the lovely old Harrison's Yellow, semi-double, bright yellow. A very striking low climber, bursting into showers of sparkling bloom in the early summer months. Its foliage is most distinctive.

Tausendschoen. POLYANTHA. Flowers soft pink when opening, the petals becoming reflexed with carmine as the blooms expand, medium size and double, produced in clusters; growth vigorous, climbing, almost thornless.

Veilchenblau. HYBRID MULTIFLORA. The famous "Blue Rose." Semi-double, purple-rose flowers changing to violet-blue when fully open. Immense clusters, borne profusely on strong canes.

All of these roses are strong two-year-old bushes, budded on Manetti roots. They will bloom profusely next summer. Price 75 cents each; 5 for \$3.50; 10 for \$6.50; 30 for \$16.50; 100 for \$55. All postpaid.

THE "NILES THREE"

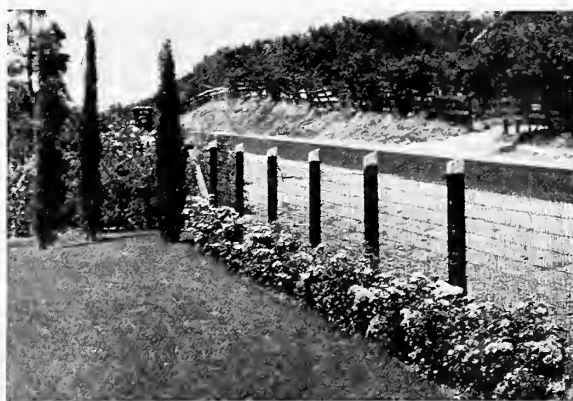

As Climbers

Climbing Hoosier Beauty. HYBRID TEA. Splendid dark red blooms of perfect form and delightful fragrance. One of the very best ever-blooming climbers. The buds are long, slender and of an exquisite delicacy of form. This is an especially good pillar rose. Bloom is identical with Hoosier Beauty which is illustrated in color on page 14. Price 75 cts. each.

Climbing Los Angeles. HYBRID TEA. A luminous flame pink with golden shading at the base of each petal. The buds and blooms are of exceptionally good form and pleasingly fragrant. A strong growing climbing sport of the very popular Los Angeles. The blooms are identical with those of Los Angeles illustrated in color on page 14 except that they are somewhat larger. Price \$1.00 each.

Climbing Mme. Edouard Herriot. HYBRID TEA. Brilliant coral-red buds opening to flowers of flaming pink and orange. One of the most free-blooming of the climbing Hybrid Teas. Flowers are somewhat larger and more brilliant than those of the bush form which is illustrated on page 14. Price \$1.00 each.

The "Niles Three" Climbers, one of each for \$2.35, postpaid

Rose hedge of free-blooming Lafayette.

Polyanthas (BABY ROSES)

Cecile Brunner. POLYANTHA. Small perfectly formed roses of delicate pink touched with gold at base of petals. The best known of the baby roses and deserving of its great popularity.

The Chatillon. POLYANTHA. Too much praise can not be given to this most wonderful Polyantha rose. It is so distinctive with its great trusses of bright pink semi-double blooms shaded lighter toward the center which completely envelop the plant, that when once seen it makes an impression which is not soon forgotten. It is a most vigorous grower and is very desirable for massing and borders.

Erna Teschendorf. POLYANTHA. Flowers brilliant dark crimson and permanent in character; free flowering and a good grower.

Lafayette. POLYANTHA. Semi-double blooms of lovely cherry-red borne in large clusters throughout the year. A really continuous bloomer. Unexcelled as a bedding rose or for use as a low hedge. A very strong growing rose and one that we highly recommend.

Miss Edith Cavell. POLYANTHA. Small, semi-double blooms of brilliant red with dark shadings. Flowers are produced freely in large clusters. Plant is of dwarf but sturdy growth.

Orleans Rose. POLYANTHA. Flowers small, fairly double and a brilliant bright red suffused with rose and center white. A profuse and continuous bloomer, which is very good for massing and for borders.

Superba. POLYANTHA. Described on page 8. \$1.00.

All of these roses are strong two-year-old bushes, budded on Manetti roots. They will bloom profusely next summer. Price, (except Superba) 75 cents each; 5 for \$3.50; 10 for \$6.50; 30 for \$16.50; 100 for \$55. All postpaid.

USE CLIMBING ROSES

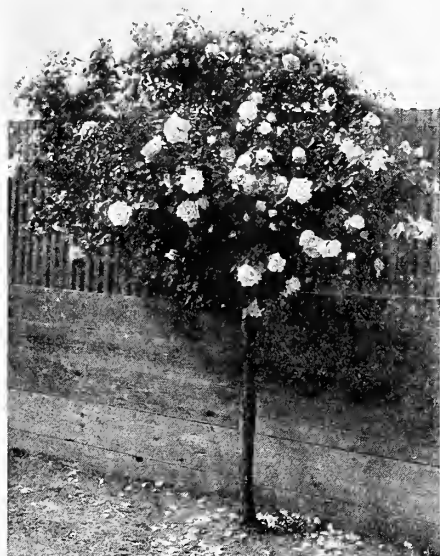

to cover a fence, a pergola, a shed, a wall, a doorway. We recommend for quick growth and profuse bloom the American Pillar or Paul's Scarlet Climber.

A ROSE HEDGE

is always trim and attractive if given reasonable care. At times it is a mass of glowing color. We recommend the cherry crimson Lafayette.

Standard Roses

A Tree or Standard Rose

COMMONLY known as Tree Roses, Standards are budded on vigorous wild stocks 39 inches from the ground. We exercise great care in growing our tree roses. Each plant is carefully staked and from two to three buds are placed in each stem in order to secure a uniform symmetrical head. Standard Roses add materially to the beauty of the garden, particularly where formal effects are desired, as in Memorial Parks.

Proper pruning is essential. Shorten in the head and thin out the plant, causing it to become symmetrical, and it will respond with a surprising wealth of bloom. The first two seasons, wrap the stem with paper or burlap to prevent sunburn, and cut away all suckers appearing below the crown.

Price \$2.50 each; \$10.00 for 5. Specimen plants in 5-gallon cans, \$3.00 each; \$12.50 for 5.

A California rose garden, showing the exuberance of bloom possible under the best conditions

~ FRUIT TREES ~

Fruit Trees

SINCE 1865 the CALIFORNIA NURSERY COMPANY has been supplying California and the other western states with high class stock of fruit trees. Many of the varieties now grown commercially were first introduced by us. Our many years of experience in the growing of fruit trees, combined with ideal soil and climatic conditions, place us in a position to offer you the very best fruit trees obtainable at the lowest cost for which good trees can be produced.

GUARANTEE. The California Nursery Company will exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the California Nursery Company shall be liable only for the sum paid for the stock which may prove untrue, and shall not be liable for any greater amount.

We invite you, if interested, to send for our 52-page catalog of fruit trees and ornamental trees and shrubs in which you will find a detailed description of each variety of fruit.

Prices f. o. b. nursery. No packing charges where cash accompanies order. Otherwise charges will cover cost of packing material used.

Ornamental Trees and Shrubs

A Few Suggestions for Fall Planting

FOR permanent garden effects—particularly in supplying a background or for foundation planting—ornamental trees and shrubs are essential. An investment in well grown ornamentals is real economy, since they increase in value and effectiveness from year to year.

On the following pages we suggest a few of the most popular and satisfactory trees and shrubs. Upon request we will gladly send you our 52 page catalogue of evergreen trees and shrubs, deciduous ornamentals, climbing and trailing plants, palms, bamboos and grasses, and fruit trees.

We invite you to visit our extensive growing grounds at Niles, Alameda County, California, and observe our methods of propagating strong-growing nursery stock.

Prices, f. o. b. nursery. No packing charges where cash accompanies order. Otherwise charges will cover cost of packing materials used.

ACACIA baileyana. (COOTAMUNDRA WATTLE.) A handsome tree with silvery blue foliage and brilliant golden yellow flowers, practically covering the tree in winter. Potted, 5 to 6 ft., \$1.00; 3 to 4 ft., 75c.; 2 to 3 ft., 60c. each.

ARBOR VITAE, Berckman's Golden. (THUYA ORIENTALIS AUREA NANA.) Dwarf, compact shrub; foliage a bright, lustrous, permanent yellow. For garden and porch decoration. Balled, 1½ to 2 ft., \$2.00; 1 to 1½ ft., \$1.50.

CAMELLIA japonica. Foliage ovate, dark green, thick and glossy; flowers large, double, and of various shades. Prefers a shady situation, hardy. Double red, pink and white. Potted, 1½ to 2 ft., \$3.00. 1 to 1½ ft., \$2.25.

CEDAR, Indian. (CEDRUS DEODARA.) One of the most popular park and avenue trees in California; carrying its limbs somewhat horizontal to the trunk clear to the ground, which makes it a favorite for specimen planting. An excellent "living Christmas tree." Balled, 6 to 7 ft., \$8.00; 5 to 6 ft., \$7.00; 4 to 5 ft., \$5.00; 3 to 4 ft., \$4.00; 2 to 3 ft., \$2.50.

COTONEASTER, Rockspray. (C. MICROPHYLLA.) Low growing and dense; foliage dark green and round; berries purplish red, borne along the stem; flowers white. Balled, 3 to 4 ft. spread, \$1.75; 2 to 3 ft., \$1.25; 1½ to 2 ft., \$1.00. Potted, 1 ft., 50c.

CYPRESS

Italian Cypress. (CUPRESSUS SEMPERVIRENS FASTIGIATA.) Tall, slender growing evergreen tree with straight branches lying close to the stem; fine for lining drives and landscape work. Balled, 8 to 10 ft., \$5.00; 7 to 8 ft., \$4.00; 6 to 7 ft., \$3.50; 5 to 6 ft., \$3.00; 4 to 5 ft., \$2.50. Potted, 1 ft., 75c.

Lawson Cypress. (CHAMAECYPARIS LAWSONIANA.) Handsome pyramidal tree with short and spreading branches; branchlets crowded, pendulous, fern-like and feathery. Fine as a specimen or planted in groups. Balled, 5 to 6 ft., \$6.00; 4 to 5 ft., \$4.50; 3 to 4 ft., \$3.50. Potted, 1 ft., 75c.

Scarab Cypress. (CHAMAECYPARIS LAWSONIANA ALUMI.) A variety of dense growth and columnar habit; foliage decidedly glaucous with a pronounced blue metallic hue. Balled, 4 to 5 ft., \$7.50; 3 to 4 ft., \$5.00; 2 to 3 ft., \$4.00; 1½ to 2 ft., \$3.00.

DAPHNE

White. (DAPHNE ODORA.) Small shrub of slow growth. Flowers intensely fragrant and massed in dense clusters. Blooms during winter. Potted, 1½ to 2 ft., \$3.50; 1 ft., \$2.50.

Pink. (D. ODORA MARGINATA.) Quite distinct; the leaves are edged creamy white and the flowers are pink. Potted, 2 to 2½ ft., \$5.00; 1½ to 2 ft., \$3.50; 1 ft., \$2.50.

EUCALYPTUS, Scarlet Flowered Gum. (EUCALYPTUS FICIFOLIA.) Handsome ornamental tree with large leathery leaves and great clusters of bright crimson flowers. Potted, 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25.

EUONYMUS

Decidedly useful for grouping, borders, hedges, and as single specimens. Will do well in almost any situation and character of soil. (See illustration, back cover.)

Evergreen Euonymus. (EUONYMUS JAPONICUS.) Of easy culture; foliage bright green, glossy and somewhat leathery. Balled, 4 to 5 ft., \$2.00; 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25. Potted, 1 to 1½ ft., 50c.

President Gauthier. (E. JAPONICUS.) Upright growth; foliage silvery variegated margined pink. Balled, 3 to 4 ft., \$1.75; 2 to 3 ft., \$1.50.

Duc D'Anjou. (E. JAPONICUS VIRIDI-Variegatus.) Spreading and vigorous grower; foliage striped in center with light green and pale yellow, darker green toward edges. Balled, 3 to 4 ft., \$1.25; 2 to 3 ft., \$1.00.

HEATHER (Erica)

Shrubs of wide use and great beauty. Can be planted in groups and masses, as single specimens and as pot plants. Many bloom in winter, when other flowers are scarce. (See illustration, back cover.)

White. (ERICA COTONOIDES ALBA.) Tall growing; leaves three to five in a whorl; flowers white. Spring bloomer. Balled, 2 to 3 ft., \$1.50; 1½ to 2 ft., \$1.25.

Pink. (E. MEDITERRANEA.) A popular densely branched, globular shrub; foliage dark green; flowers bright pink. Blooms all winter. Balled, 2 to 3 ft., \$1.25; 1½ to 2 ft., \$1.00.

HOLLY (Ilex)

English Holly. (ILEX AQUIFOLIUM.) Large shrub or small tree; foliage dark green, leathery and prickly; flowers small, followed by an abundance of bright red berries. Specimen plants with berries, sizes from 3 to 5 ft., at prices ranging from \$10.00 to \$20.00.

Dutch Holly. (ILEX "VAN TOL.") A self-fertile variety with hermaphrodite flowers. Grafted plant can be depended on to produce an abundance of brilliant red berries in the winter months. Balled, 1½ to 2 ft., \$4.00.

Variegated Holly. (I. AQUIFOLIUM VARIEGATA.) Foliage characteristics are most interesting. Growth is quite compact. Berries deep crimson. Balled, 1½ to 2 ft., \$4.00.

JUNIPER, Pfitzer's. (J. CHINENSIS PFITZERIANA.) New and handsome hardy variety of spreading habit with silvery green foliage. Balled, 4 to 5 ft., spread, \$7.50; 3 to 4 ft., \$5.00; 2 to 3 ft., \$3.50; 1½ to 2 ft., \$2.50. Potted, 1 ft 75c.

MATILJA POPPY. (ROMNEYA COULTERI.) The "tree poppy," California's finest native flowering plant. Perennial shrub; leaves sage green; flowers purest white, 6 inches across, with orange colored center. Potted, \$1.50.

MYRTLE. (MYRTUS COMMUNIS.) Splendid small-leaved shrub, for hedges and group plantings. Hardy. Foliage glossy green; flowers white, appearing in late spring. Balled, 3 to 4 ft., spread, \$1.25; 2 to 3 ft., \$1.00. Potted, 1 to 1½ ft., 60c.

Nandina

Lawson Cypress

Oregon Grape

Ornamental Trees and Shrubs

(Concluded)

NANDINA. (*NANDINA DOMESTICA.*) Native of Japan. A leafy shrub resembling a dwarf bamboo. Foliage pink-tipped in summer, in winter bronzy-red; berries scarlet-red. Fine as a tub plant and in the garden. Balled, 3 to 4 ft., \$1.75; 2 to 3 ft., \$1.25; 1½ to 2 ft., \$1.00.

OREGON GRAPE. (*MAHONIA AQUIFOLIUM.*) Dense, low spreading shrub; foliage holly-like, glossy green, changing to purple and bronze; flowers yellow, borne in racemes, followed by a profusion of blue grape-like berries. Balled, 4 to 5 ft., \$2.00; 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25. Potted, 8 to 12 in., 50c.

ORIENTAL PLANE. European Syeamore. (*PLATANUS ORIENTALIS.*) A handsome tree of large proportions for park and avenue planting. Bare root, 10 to 12 ft., \$1.75; 8 to 10 ft., \$1.25; 6 to 8 ft., \$1.00.

PITTOSPORUM, Japanese. (*P. TOBIRA.*) A handsome variety; foliage dark green and glossy; flowers white, fragrant and numerous. Balled, 3 to 4 ft., \$2.00; 2 to 3 ft., \$1.50; 1½ to 2 ft., \$1.25. Potted, 1 to 1½ ft., 60c.

SCARLET THORN. (*CRATAEGUS MONOGYNA PAULI.*) Paul's Double Scarlet Thorn. Small tree of erect habit and quick growth. Flowers double and earmine in color; berries dull red. Bare root, 6 to 7 ft., \$1.75; 5 to 6 ft., \$1.50.

TOYON, California Christmas Berry. (*PHOTINIA ARBUTIFOLIA.*) Admired for its handsome foliage and brilliantly colored berries. Does well under cultivation. Potted, 1½ to 2 ft., \$1.00; 1 to 1½ ft., 75c.

VIBURNUM

Admirable for hedges, grouping, and as single plants. Nearly all are free blooming, especially during the winter months.

Viburnum tinus lucidum. (*LAURUSTINUS GRANDIFLORA.*) A strong grower; foliage large and glossy; flower clusters of immense size; very fine. Balled, 4 to 5 ft., \$1.75; 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25. Potted, 1 to 1½ ft., 75c.

V. tinus robustum. Shrub of large size. Foliage dark green and crinkled; flowers delicate pink. New and somewhat rare. Balled, 4 to 5 ft., \$1.75; 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25.

V. tinus striatum. (*LAURUSTINUS ROTUNDIFOLIA.*) Tall, slender and erect growth; foliage slightly rounded; flower clusters small but free blooming. Balled, 4 to 5 ft., \$1.75; 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25. Potted, 1 ft., 60c.

V. tinus variegatum. (*VARIEGATED LAURUSTINUS.*) Foliage decidedly yellow marked, otherwise true to type. Balled, 3 to 4 ft., \$1.50; 2 to 3 ft., \$1.25; 1½ to 2 ft., \$1.00.

WISTERIA, Pink Japanese. (*WISTERIA MULTIJUGA ROSEA.*) Flowers rose-colored, suffused shell-pink. Rare. \$2.00.
